The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/525,900	Applicant(s) POMMEREAU, CLAUDE	
	Examiner MICHAEL E. BUTLER	Art Unit 3653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Applicant's claim of priority as a national stage 371 application of application of **PCT/FR03/02655 with International Filing Date of 09/05/2003** which claims priority to application 0211090 filed 9/6/2002 in France is acknowledged.

Election/Restriction

2. Applicant's election of species II without traverse of the election of species requirement is acknowledged and made final.

3. Claims 2-6 and 9-16 and 19-17 are withdrawn from further consideration.

IDS

4. The information disclosure statement filed 6/22/2005 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. References FR2625442 and DE19627187 were not supplied with a statement of relevance. It has been placed in the application file, but the information referred to therein has not been considered. The abstracts are inadequate to convey the relevance as the French and German documents may contain matter not mentioned in a less detailed abstract.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --
the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

6. Claim(s) 1, 15-16 is/are rejected under 35 U.S.C. 102(b) as being anticipated by Wang 5549518 which discloses all the claimed elements including: a golf ball dispenser comprising: an upper container to contain golf balls (2), flange to receive the balls coming from the container (c2 L 35-45) a pivotal supply arm (32), arm comprising a brake for accurate depositing of the golf ball (322), the brake comprising a bend (322).

7. Claim(s) 1, 7-8, is/are rejected under 35 U.S.C. 102(b) as being anticipated by Smith 5624325 which discloses all the claimed elements including: a golf ball dispenser comprising: an upper container to contain golf balls (46), flange to receive the balls coming from the container (40) a pivotal supply arm (20), upper arm comprises a means for singulating balls in dispenser arm (70;c6 L 7-10), the means comprising a rim arm (70;c6 L 7-10).

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject

matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim(s) 1 and 28-29 is/are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith in view of Hodgin 3738662 wherein the Smith discloses the elements previously discussed and Hodgin 3738662 discloses any elements not inherently taught by the former including: plural non-concentric rings for slowing down the drop of the ball, the distance between concentric rings decreasing closer to the arm lower end (80, rings at end of arm),

It would have been obvious at the time of the invention for Smith to use rings to slow the ball and avert the ball bouncing off the arm or tee as taught by Hodin.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Exmr. Michael E. Butler whose telephone number is (571) 272-6937.
